We are going to create a digital platform for exchange learning material for your sector. Do you think that such a digital tool will be useful for you/your organization at your training/learning activities?

Further, do you think that this platform could be fulfilling a gap in search for learning material in the above mentioned sectors both for existing or for a future/new learning need?

Do you think that the platform (offering customized and specific information on learning material for graphic communication – print and digital media) will be more useful in comparison with a traditional browsing on the internet with
